PHOTOGRAPHY

## TIPS FOR A GREAT PHOTO SHOOT

Bella Baby Photography is the new face of hospital baby portraiture. We bring experienced photographers to the hospital to capture your baby's first photograph with a natural, artistic style. Your professional mini-photoshoot takes place in the comfort of your hospital room. Photos are posted to a custom slide-show for you to view shortly after your session. You may also take advantage of our bedside ordering if you wish. The custom slide-show is password protected and posted online for viewing and ordering, which is only available to those with whom you choose to share your password with. Photos will be available for 14 days after the photos are taken and you are welcome to share the slideshow with your friends and family so that they can see your bundle of joy.

- Babies look beautiful when being held in their parents' arms or cuddled in one of their own baby blankets. Bring your favorite baby blanket or afghan from home for use in the photo shoot. A beautiful blanket can add texture, color and memories to your newborn's photos. If you don't have a special blanket at the time of the shoot, no worries, the white hospital sheets make beautiful pictures.
- We love to include Mom and Dad's hands in our photos. Wear clear or neutral polish on the day of your shoot. We want your baby to be the focus of the photos.
- Bring a solid black, brown or grey shirt for you to wear in the photos. We may photograph your baby in your arms. These colors look great in both color and black and white prints.
- Friends, family, and siblings are welcome to stay to view this special rite of passage and participate in the photo shoot. We are always happy to include siblings and other family members if they are visiting at the time of the session, but we typically cannot wait for them to arrive.
