

# GRAND VIEW CHILDREN'S CENTER

## Welcome to Kindergarten!

Welcome to Kindergarten! Kindergarten in room 3 is such an exciting and important time in your child's life. Our Kindergarten program is the time where we establish your child's academic foundation for first grade.

Going to kindergarten is an important step for your child. It will help them learn skills that they will build on throughout their life.

In kindergarten your child will grow socially and emotionally. Their ability to think, use and recognize language and their fine motor skills will be developed through play, art, dance, music, movement and interacting with others. Most importantly, your child will be learning to become an effective learner as they develop and extend their communication skills, build their self-confidence, learn to be creative, and develop skills that assist them with reading, writing and mathematics.

Our kindergarten curriculum meets the academic learning standards developed by the Pennsylvania of Education. Within our curriculum all basic subjects are taught such as Language Arts, Math, Science, Social Studies, Art, as well as exploring the exciting aspects of technology and music.

We know from experience that parent involvement is essential to maximize the benefits the child gets from his or her school experience. Regardless of the experience and expertise of the teacher, research shows that the biggest and most important factor in a student's school success is the involvement of the PARENT in daily school experiences.

Please take some time to come meet the kindergarten teachers in room 3. Ms. Kristy and Ms. Linda would love to answer any of your questions and concerns you may have.
