

3D Breast Imaging

NOW OFFERED AT:

Sellersville Outpatient Center and
Health Center at Quakertown

COMING SOON TO:

Harleysville

The new technology, **Digital Breast Tomosynthesis** (DBT), uses 3D imaging technique with results proven superior to traditional 2D mammography.

Advantages of 3D imaging include:

- Greater visibility and better understanding of breast tissue
- Improved detection of cancer
- Lower biopsy rates
- Reduced need for follow-up imaging
- Uses the lowest dose of radiation in the industry

**To schedule a mammogram, call Central Scheduling at
Grand View Health: 215-453-4100**
