

WORTH A *thousand* WORDS

Bella Baby is the exclusive newborn photography company at your hospital!

We are honored to have the opportunity to capture these first memories of your little one. One of our experienced professional photographers will be in to photograph your baby on your first full day at the hospital as we try to avoid photographing on discharge day. This photo session is complimentary with no obligation to purchase and pricing starts as low as \$30.

How to prepare for the session:

- Feel free to bring your favorite baby blanket, hat or special memento to include in your photoshoot.
- Parents and siblings are welcome to participate if they are visiting during the session.

What to expect during and after the session:

- Sessions typically last about 15-20 minutes and will take place in your room.
- Photo viewing is available the same day.
- Password protected gallery access will be provided for easy sharing with friends and family.
- Purchases can be made in the hospital or later from home.

We can't wait to meet you and your new baby!
